Summary

Software Engineer with 2.5 years of industry experience and an M.S. in Computer Software Engineering, seeking a full-stack, front-end, or backend SDE role to build scalable web applications and contribute to high-impact engineering teams.

Education

M.S. in Computer Software Engineering

Jan 2024 – Dec 2025

Arizona State University, Tempe, AZ, USA

GPA: 3.87

Relevant Coursework: Advanced Data Structures and Algorithms, Cloud Computing, Human-Computer Interaction, Mobile Systems, Game Design and Development

B.E. in Information Science and Engineering

Aug 2016 – May 2020

Dr. Ambedkar Institute of Technology, Bengaluru, India

GPA: 8.65

Technical Skills

Languages: C++, Java, Python, JavaScript, TypeScript, SQL, HTML, CSS

Frontend: React, React Native, Tailwind CSS, Vite, HTMX, Flexbox, Responsive Design, Accessibility (a11y)

Backend & Cloud: Spring Boot, FastAPI, Node.js, RabbitMQ, PostgreSQL, Supabase, AWS, Vercel, REST APIs

Tools & Practices: Git, GitHub, Figma, Agile/Scrum, Software Testing, CI/CD, Android Studio

Certifications: Career Essentials in Generative AI [Microsoft & LinkedIn], Responsive Web Design [freeCodeCamp], Unreal Engine: Landscape Creation [Edge Metaversity], Problem Solving, Python & Video Games [University of Alberta / Coursera]

Professional Experience

Streetcare, Remote, USA

Jan 2026 – Apr 2026

Volunteer Software Developer

- Led a team of volunteer developers to design and develop webpages for BrightMind and Streetcare using Figma, owning end-to-end UI/UX design and frontend implementation.

Tata Consultancy Services, Bengaluru, India

Jul 2020 – Jan 2023

Systems Engineer

- Maintained 100% uptime across MFA and SmartCard authentication services for Shell, achieving a 15% improvement in reliability through proactive monitoring and incident response.
- Automated security test workflows for SmartCard products (e.g., YubiKey) using Python, identifying and resolving 50+ vulnerabilities before production deployment.
- Coordinated migration of a critical authentication service to a private cloud, contributing to a 40% scalability improvement and 25% reduction in operational costs.
- Promoted to team lead of a six-member team within 18 months; received the Recognition for Excellence in Service award by Shell (2022).

Projects

Hinna — Process Automation Tool, ABC Academy of Music

Jan 2025 – Dec 2025

Spring Boot, HTMX, Thymeleaf, RabbitMQ, PostgreSQL, REST APIs, AWS

- Built core workflow features including a drag-and-drop node builder, node deletion, and loop mechanisms using HTMX, Thymeleaf, Spring Boot, and PostgreSQL; contributed to a RabbitMQ-based microservice framework for asynchronous execution.
- Served as Scrum Master for 3 of 6 sprints; contributed to AWS deployment, SSL configuration, RBAC, and authored handoff documentation for the incoming team.

NP Kanban Board

Mar 2026

React, Vite, Tailwind CSS, JavaScript, Supabase, Vercel

Github, Website

- Built and deployed a fully functional Kanban board in 6 hours with real-time Supabase persistence and a responsive drag-and-drop UI; live on Vercel.

Health Guardian AI — Sunhacks (Hackathon) 2025

Sep 2025

Python, FastAPI, Supabase, Google Gemini

Github

- Built a multi-agent health platform analyzing medical lab reports and grocery scans to generate real-time, risk-tiered health alerts and sustainability scores.
- Designed the coalescing agent: a FastAPI microservice aggregating outputs from all upstream agents, applying risk-tier logic, and returning a unified health report via Supabase with Row Level Security.

Compiler for Custom Programming Language ‘Porygn’

Apr 2024 – May 2024

Prolog, Python

Github

- Co-developed a two-stage compiler with a Prolog-based lexer and Python parser/runtime, supporting syntax validation, token mapping, and intermediate code generation with comprehensive edge-case test suites.
